VueKIT

Price: \$210.00

VueCAM VC202

VueCAM is an IP camera which transmits real-time, high quality digital video over any existing AC wiring. It employs simple "Plug in and Play" functionality utilizing innovative new technology called Powerline data communications based on HomePlug™ 1.0 standards. It has a built in web server which allows for live viewing over the Internet, and will operate without the need for any further cabling eliminating cost, complexity and time for installation required for conventional surveillance cameras.

VueBRIDGE VB85T

The VueBRIDGE has been designed to convert Powerline data signals from any AC wiring to standard Ethernet network connections, transforming AC power into a secure broadband network which can easily be integrated into any existing video surveillance network.

VueKIT Software VKSW4 DVR Application

VisualGate's DVR type software VSW-202 will support monitoring and recording of up to 4 VC202 cameras and offers advanced surveillance features such as user-friendly wizards, user management and user defined configurations. The flexible software features include continuous recording, motion detection, real-time playback, and remote connection.
